## PCV45A Portable Flexible Shaft Vibrator

The PCV45A is a portable concrete vibrator with a flexible shaft for efficient consolidation in hard-to-reach areas.

- Portable design for easy use on any job site: Lightweight and easy to transport for convenient use.
- Flexible shaft for reaching confined spaces: Enables thorough compaction in hard-to-reach areas.
- Powerful vibrations for effective compaction: Delivers strong vibrations to eliminate air voids effectively.
- Ideal for various concrete consolidation applications: Versatile tool for a wide range of concrete projects.
- Suitable for precast concrete, columns, and hard-to-reach areas: Perfect for applications requiring maneuverability.

### Specifications

- Model - PCV45A Handheld Vibrator
- Item No.- 6100040456
- Engine - Honda GX35
- Power - 1.3Hp
- Weight - 6kg
- Length - 1024mm
- Head - 45mm

The PCV45A portable flexible shaft vibrator is a professional tool designed for efficient concrete consolidation in difficult-to-access locations. Its flexible shaft allows for easy maneuvering and reaching around obstacles, while the powerful motor delivers strong vibrations to eliminate air pockets and ensure a strong, uniform concrete finish. This portable vibrator is ideal for precast concrete applications, column pours, and general concrete consolidation tasks where accessibility is a challenge.
