External Vibrators

## AR75/3/400 3000rpm 415v External Vibrator

The AR75/3/400 is a high-power external vibrator for superior concrete consolidation in large-scale construction projects.

- Normal frequency speed of 3000 RPM for efficient consolidation: Saves time on large concrete pours.
- 415V three-phase power for industrial use: Built for heavy-duty applications on industrial job sites.
- Powerful vibrations for superior compaction: Delivers strong vibrations to eliminate air voids effectively.
- Ideal for large-scale construction projects: Suitable for big concrete pours and demanding jobs.
- Suitable for material movement large projects: Can handle a variety of challenging applications.

### Specifications

- Model - AR75/3/400
- Item No.- 5000007799
- Weight - 33kg
- Force - 25.2kN
- Voltage - 400V
- RPM - 3000rpm
- Frequency - 50Hz

The AR75/3/400 external vibrator is a heavy-duty tool designed for exceptional concrete consolidation in large construction projects. Its normal frequency speed of 3000 RPM delivers powerful vibrations to eliminate air pockets and ensure a strong, uniform concrete finish. The 415V three-phase power supply makes it ideal for industrial environments. This external vibrator is suitable for material movement applications demanding concrete consolidation tasks.
