External Vibrators
AR64/3/400 3000rpm 415v
External Vibrator

The AR64/3/400 is a high-performance external vibrator for demanding concrete consolidation tasks in large projects.

- Normal frequency speed of 3000 RPM for efficient consolidation: Saves time on large concrete pours.
- 415V three-phase power for industrial use: Designed for heavy-duty applications on industrial job sites.
- Powerful vibrations for superior compaction: Delivers strong vibrations to eliminate air voids effectively.
- Ideal for demanding concrete consolidation tasks: Handles tough jobs requiring exceptional compaction.
- Perfect for material movement on construction projects.

Specifications

- Model - AR64/3/400
- Item No.- 5100004210
- Weight - 18.7kg
- Force - 16kN
- Voltage - 400V
- RPM - 3000rpm
- Frequency - 50Hz

The AR64/3/400 external vibrator is a heavy-duty tool designed for superior concrete consolidation in large-scale applications. Its normal frequency speed of 3000 RPM delivers powerful vibrations to eliminate air pockets and ensure a strong, uniform concrete finish. The 415V power supply makes it ideal for industrial environments. This external vibrator is suitable for material movement tasks on large construction projects.
