External Vibrators
AR54/6/250 6000rpm 250v
External Vibrator

The AR54/6/250 is an ultra-high-speed external vibrator for rapid concrete consolidation in construction projects.

- Hi-frequency speed of 6000 RPM for extremely fast consolidation: Significantly reduces time spent on concrete pours.
- Developed for precast concrete production: High-frequency vibration for efficient consolidation in exposed concrete elements.
- Powerful vibrations for effective compaction: Improves concrete strength and durability.
- Ideal for various concrete consolidation applications: Versatile tool for a wide range of concrete projects.
- Suitable for precast concrete, mass pours, and fast consolidation: Perfect for applications requiring speed.

Specifications

- Model - AR54/6/250
- Item No.- 5000006917
- Weight - 13.6kg
- Force - 14.2kN
- Voltage - 250v
- RPM - 6000rpm
- Frequency - 200Hz

The AR54/6/250 external vibrator is a professional tool designed for exceptionally fast concrete consolidation. Its hi-frequency speed of 6000 RPM ensures rapid elimination of air bubbles, while the 250V power allows for easy operation on most job sites. This external vibrator is ideal for precast concrete applications, mass concrete pours, and general concrete consolidation tasks where speed is a priority.
