Pumps

SP55/6 2" Flexible Shaft Pump 6m Shaft

Wacker Neuson SP55/6: Reaches confined spaces with a flexible shaft for dirty water pumping.

- Flexible shaft for remote operation: Enables pumping from confined spaces with limited access.
- Efficient dirty water handling: Pumps dirty water from flooded basements, trenches, and excavations.
- Submersible design: Operates effectively in submerged environments.
- Lightweight and portable: Easy to transport and maneuver on the jobsite.
- User-friendly design: Simple to operate for ease of use.

Specifications

- Model - SP55/6
- Item No.- 6100036711
- Length - 6 Meters
- Type - Trash
- Flow - 920L/min

The Wacker Neuson SP55/6 is a submersible flexible shaft trash pump designed for efficient dirty water handling in hard-to-reach areas. Its flexible shaft allows for remote operation of the pump unit, making it ideal for dewatering flooded basements, trenches, and excavations with limited access. The pump's lightweight and portable design ensures easy transport and use on the jobsite.
