Internal Vibrators - High Frequency  
**MIV60 60mm Head 5m Shaft  
Flexible Shaft Vibrator**

The MIV60 is a powerful concrete vibrator with a large head on a flexible shaft for efficient consolidation in hard-to-reach areas.

- Large 60mm diameter head for effective compaction: Ensures thorough consolidation in dense concrete and larger pours.
- 5 meter long flexible shaft for easy maneuvering: Reaches around obstacles for convenient use in confined spaces.
- Reaches difficult locations for complete consolidation: Ideal for applications with limited accessibility.
- Powerful motor for efficient vibration: Delivers strong vibrations to eliminate air pockets effectively.
- Compatible with HD3.7 or MD3.5 Petrol Drive Motors and Diesel YD3.5 Drive motor available

Specifications

- Model - MIV60 Pendulum Vibrator
- Item No.- 6100040172
- Length - 5 Meters
- Head - 60mm
- RPM - 14,500rpm

The MIV60 flexible shaft vibrator is a professional tool designed for powerful concrete consolidation in tight spaces. Its large 60mm diameter head ensures effective compaction even in dense concrete pours. The 5-meter long flexible shaft allows for easy maneuvering and reaching around obstacles. This flexible shaft vibrator is ideal for precast concrete applications, column pours, and general concrete consolidation tasks where accessibility is a challenge.
