MP70 Plate Compactor

The Wacker Neuson MP70 is a powerful petrol vibratory plate compactor for professional jobs. Its low weight, compact design, and easy operation make it ideal for compacting various materials.

- **Mid-size design:** Provides a balance between easy handling and strong compaction force.
- **Versatile compaction:** Suitable for compacting various materials like soil, gravel, and sand.
- **Ideal for multiple applications:** Useful for driveways, paths, sub-bases and other jobs.
- **User-friendly operation:** Simple to use for increased productivity.
- **Durable construction:** Built to withstand demanding worksites.

Specifications

- Model - MP70
- Item No.- 5000630243
- Engine - Loncin-G210F
- Power - 5.9Hp
- Weight - 77kg
- Operating Width - 460mm
- Force - 20kN

The Wacker Neuson MP70 is a versatile vibratory plate compactor designed for professional contractors. This petrol-powered model features a powerful engine that delivers strong centrifugal force for effective compaction of a variety of materials, including sand, crushed rock, granular materials, and even interlocking pavers. Despite its power, the MP70 is surprisingly lightweight and compact, allowing for easy maneuvering on construction sites. The design also incorporates a vibration-isolated handle with throttle control for operator comfort and reduced fatigue. With its low-maintenance design and user-friendly features, the MP70 is a reliable workhorse for any professional project.
