- |                           |                            |                                       |                                  |
|---------------------------|----------------------------|---------------------------------------|----------------------------------|
| Hour meter                | Overhead guard             | Cab                                   | 58 cylinder engine               |
| Horn                      | Standard forks             | Rotating warning light                | Steering cylinder piston         |
| Oil pressure alarm        | Washer switch              | Vertical exhaust                      | User specified color             |
| Throttle control valve    | Hydraulic control of lift  | Double air filter                     | Central adjustment               |
| Power steering            | Washer tank                | Interlocked gate                      | Dual line and protective device  |
| Rubber pedals pad         | Speed limiting valve       | Interlocked gate sensor               | LPG with the fuel tank           |
| Backrest                  | Oil cooler                 | Heater                                | LPG single seat dual-fuel system |
| Back view mirror          | Battery-charging indicator | Gold line                             | Side mirror                      |
| Front overhead light      | Wiper-wash mast            | Warning fork carriage                 | Steel protective device          |
| Transmission oil filter   | Water divider              | Wiperless                             |                                  |
| Right hand control device | Overhead guard             | Purifying muffler                     |                                  |
| Parking brake valve       | Speedometer oil gauge      | Fine shifter                          |                                  |
| Water temperature meter   | Combined display           | Fine adjustment                       |                                  |
| Attached tools            | Central control bar        | Rear light                            |                                  |
| Riser combined light      |                            | Air conditioning (on request)         |                                  |
| Transmission oil filter   |                            | Electrohydraulic switch               |                                  |
| Right hand control device |                            | GPS driving control                   |                                  |
| Water temperature meter   |                            | Temp converter oil temperature sensor |                                  |
| Attached tools            |                            |                                       |                                  |

**S**SERIES Reliable forklift

ENGINE POWERED  
FORKLIFT **1.35 ton**

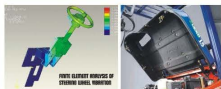

**Reliable forklift**

**A reliable mast**

The impact and vibration of mast are reduced significantly by using buffer device. Through finite element analysis plus optimizing the structural parameters, the vibration acceleration is reduced by 40%.

**More scientific and environmental design**

Equipped with high-quality engine, the emission meets the latest European EC and the EPA environmental regulation. The use of Non-asbestos insulation equipment is very effective to lower down the noise.

The innovative design and optimized configuration of the lifting system improve the operators' visibility greatly, and provide a clear and accessible focus of vision to ensure the safety & efficiency of operating.

**More powerful**

G series forklifts greatly enhance various aspects of key performances particularly in power performance through reducing the losses of engine torque nearly twice as before.

**↑8.2%**  
THE MAXIMUM LIFTING  
SPEED IS INCREASED

**↑3%**  
THE DURABILITY IS  
INCREASED

**↑9%**  
THE REDUCED DRUM-  
HULL IS INCREASED

**↓2%**  
THE FULL CONSUMPTION  
IS REDUCED

**More comfortable ergonomic design**

Through optimum design of the hood and lift cylinder, the space for driver's legs is twice wider than other models, the bigger footplate make the operators to get on and off with ease. Such spacious space eases the operating more comfortable.

The swan-type display and dual-handle combined FFR direction switch to ensure more convenient and smooth operation.

Adopting multi-type steering wheel suspension seat with air-roof, seat belt, safe and overtake.

**Excellent safety performance**

Profiled steel for overhead guard  
As the first forklift producer to use profiled steel for overhead guard in China, our G series forklift is available with embedded cabin doors to ensure more safety and seat performance.

Greatly enhanced frame strength  
G Series forklifts have much stronger frame structures, while its structural strength meets the ANSI/ISO/SETR (American National Regulation) requirements.
