External Vibrators
AR26/3/400 3000rpm 415v
External Vibrator

The AR26/3/400 is a high-speed external vibrator for efficient concrete consolidation in industrial applications.

- Normal frequency speed of 3000 RPM for efficient consolidation: Saves time on large concrete pours.
- 415V three-phase power for industrial use: Built for heavy-duty applications on industrial job sites.
- Powerful vibrations for superior compaction: Delivers strong vibrations to eliminate air voids effectively.
- Ideal for various concrete consolidation applications: Versatile tool for a wide range of concrete projects.
- Suitable for precast concrete, mass pours, and large projects: Can handle demanding concrete consolidation tasks.

Specifications

- Model - AR26/3/400
- Item No.- 5100003960
- Weight - 6.3kg
- Force - 3.47kN
- Voltage - 400V
- RPM - 3000rpm
- Frequency - 200Hz

The AR26/3/400 external vibrator is a heavy-duty tool designed for fast and effective concrete consolidation on industrial job sites. Its high operating speed of 3000 RPM delivers powerful vibrations to eliminate air pockets and ensure a strong, uniform concrete finish. The 415V power supply makes it ideal for use in industrial environments. This external vibrator is suitable for precast concrete applications, mass concrete pours, and general concrete consolidation tasks on large construction projects.
