## HP50A Truss Screed 5HP Petrol

The HP50A is a powerful petrol engine section for a truss screed, leveling large concrete areas.  
(Truss sold separately)

- Powerful 5HP petrol engine for efficient concrete leveling: Delivers strong power for large concrete pours.
- Designed for use with a truss screed (truss sold separately): Creates a flat, even surface over a wide area.
- Ideal for large-scale concrete leveling applications: Perfect for leveling driveways, floors, and other expansive areas.
- Compatible with a 1.5 meter aluminum truss: Ensures a long working width for efficient concrete finishing.
- Durable construction for demanding job site use: Built to withstand tough jobsite conditions.

### Specifications

- Model - HP50A
- Item No.- 5000009508
- Engine - Honda GX160
- Power - 5.5Hp
- Length - 1.5 Meters

The HP50A is a powerful petrol engine section specifically designed for use with a truss screed. The 5 horsepower engine provides ample power for efficient leveling of concrete over large areas. This petrol power section is ideal for use with a 1.5 meter aluminum truss (sold separately) to create smooth, level concrete surfaces on construction projects.
