## Internal Vibrators - High Frequency **IRFU38/230/05 38mm Head 5m Shaft Internal Vibrator**

The IRFU38/230/05 is a powerful internal vibrator with a 38mm head and 5m shaft for consolidating concrete during construction projects. Maintenance is significantly reduced as there are no drive shafts or greasing required. Maintenance is significantly reduced as there are no drive shafts or greasing required.

- 38mm diameter head for effective concrete compaction: Ensures thorough compaction, even in dense concrete.
- 5 meter long shaft for deep reach: Reaches deep into concrete pours to eliminate air bubbles throughout.
- Powerful motor for efficient vibration: Creates strong vibrations to effectively eliminate air pockets.
- Durable construction for long-lasting performance: Built to withstand tough construction environments.
- Ideal for various concrete consolidation applications: Versatile tool for a wide range of concrete projects.

### Specifications

- Model - IRFU38/230/05
- Item No.- 5000610025
- Lead Length - 15 Meters
- Length - 5 Meters
- Voltage - 230v
- Head - 38mm

The IRFU38/230/05 internal vibrator is a professional tool designed to eliminate air bubbles and improve the strength of concrete by vibration. Its 38mm diameter head ensures effective compaction in medium to large-sized concrete pours. The 5-meter long shaft allows for deep reach into concrete elements, ensuring uniform consolidation throughout. This internal vibrator is ideal for precast concrete applications, soil stabilization, and general concrete consolidation.
