all it takes!

Internal Vibrators - High Frequency

Backpack ACBe Battery Internal Vibrator Skin

The ACBe is a wearable backpack vibrator for internal concrete consolidation with long battery life for uninterrupted work. Maintenance is significantly reduced as there are no drive shafts or greasing required.

- Backpack design for worker mobility and reduced fatigue: Comfortable to wear for extended use, allowing for easy movement around the jobsite.
- Powerful vibrations for effective compaction: Delivers strong vibrations to eliminate air pockets and ensure a strong finish.
- Long battery life for uninterrupted work: Eliminates the need for frequent recharging, maximizing working time.
- Ideal for large concrete pours, walls, and various applications: Versatile tool for a wide range of concrete consolidation tasks.
- Battery-powered for flexible use on any job site: Provides mobility and eliminates the need for an outlet.

Specifications

- Model - ACBe Backpack Vibrator Skin
- Item No.- 5100050080
- Weight - 3.9kg
- Voltage - 51V
- Frequency - 200Hz
- Options - 1.5m shafts available with either 45mm or 57mm vibrating heads

The ACBe backpack internal vibrator is a professional tool designed for comfortable and efficient concrete consolidation. Worn as a backpack, it provides excellent worker mobility and reduces fatigue during long pours. The powerful motor delivers strong vibrations that eliminate air pockets and ensure a strong, uniform concrete finish. The long-lasting battery allows for uninterrupted work on the job site. This backpack vibrator is ideal for large concrete pours, walls, and applications where worker mobility and long working times are important.
