Internal Vibrators - High Frequency
**MIV28 28mm Head 5m Shaft
Flexible Shaft Vibrator**

The MIV28 is a flexible shaft vibrator with a 28mm head for efficient concrete consolidation in hard-to-reach areas.

- 28mm diameter head for tight spaces: Enables thorough compaction in hard-to-reach areas.
- 5 meter long flexible shaft for easy maneuvering: Reaches around obstacles for convenient use.
- Reaches confined spaces for thorough consolidation: Ideal for applications with limited accessibility.
- Powerful motor for efficient vibration: Delivers strong vibrations to eliminate air pockets effectively.
- Compatible with HD3.7 or MD3.5 Petrol Drive Motors and Diesel YD3.5 Drive motor available.

Specifications

- Model - MIV28 Pendulum Vibrator
- Item No.- 6100042221
- Length - 5 Meters
- Head - 28mm
- RPM - 14,500rpm

The MIV28 flexible shaft vibrator is a professional tool designed for efficient concrete consolidation in difficult-to-access locations. Its 28mm diameter head ensures effective compaction even in tight spaces. The 5-meter long flexible shaft allows for easy maneuvering and reaching around obstacles. This flexible shaft vibrator is ideal for precast concrete applications, column pours, and general concrete consolidation tasks where accessibility is a challenge.
