Pumps

PDI3A 3" Diaphragm Pump

Wacker Neuson PDI3A: Powerful 3" diaphragm pump for dirty water with solids, ideal for tough jobs.

- Efficient dirty water handling: Pumps large volumes of dirty water with solids and debris from flooded basements, trenches, and excavations.
- Handles large solids (up to 3"): Diaphragm design tackles tough jobs with ease.
- Submersible design: Operates effectively in submerged environments.
- Lightweight and portable: Easy to transport and maneuver on the jobsite.
- User-friendly design: Simple to operate for ease of use.

Specifications

- Model - PDI3A
- Engine - Honda GX120
- Head - 15m
- Size - 3"/75mm
- Flow - 333L/min
- Solids - 41mm
- Suction - 7.5m

The Wacker Neuson PDI3A is a heavy-duty diaphragm pump featuring a large 3-inch diameter. This design allows it to efficiently handle dirty water containing solids and debris, making it suitable for challenging dewatering tasks. It's ideal for large-scale projects or jobs requiring extra power for thick or debris-filled water. The pump's lightweight and portable design ensures easy transport and use on the jobsite.
