MG2i Generator Invertor

Wacker Neuson MG2i: Lightweight, quiet inverter generator for clean power at home, work or play.

- Clean, stable power: Perfect for powering electronics like phones, laptops, and sensitive equipment.
- Lightweight and portable: Easy to transport and use anywhere.
- Quiet operation: Minimizes noise disruption for a more enjoyable experience.
- Economical generator: Cost-effective solution for your power needs.
- Versatile applications: Ideal for home backup power, camping trips, and powering equipment.

Specifications

- Model - MG2i
- Item No.- 5000630383
- Engine - Loncin LC148F
- Weight - 21kg
- Voltage - 230v
- Start Type - Recoil
- Max Output - 1.8Kva
- Rated Output - 1.6Kva

The Wacker Neuson MG2i is a portable inverter generator designed for user-friendliness and clean power generation. Its lightweight design and suitcase style make it easy to transport, while the inverter technology ensures smooth, stable power for electronic devices. This makes it ideal for various applications, from providing backup power at home to powering equipment during recreational activities.
