Internal Vibrators - Petrol Powered

HD3.7 MIV FWP SP Petrol Drive Unit

The HD3.7 MIV FWP SP is a powerful petrol-powered drive unit for concrete vibrators, ideal for demanding consolidation tasks.

- Powerful petrol engine for demanding consolidation: Provides ample power to effectively vibrate concrete for strong finishes.
- Ideal for high-frequency vibrator heads (MIV series): Matches the specific requirements of high-frequency concrete consolidation applications.
- Durable design for tough job site conditions: Built to withstand demanding construction environments.
- Compatible with Flexi Drive Pumps and concrete vibrators

Specifications

- Model - HD3.7 Drive Motor
- Item No.- 5000006906
- Engine - Honda GX160
- Weight - 29kg
- Options - Multiple Shaft Lengths & Head sizes available

The Drive Unit HD3.7 MIV FWP SP is a high-performance petrol motor designed for powering concrete vibrators. This powerful unit is suitable for heavy-duty concrete consolidation applications and works well with high-frequency vibrator heads (MIV series). The HD3.7 delivers exceptional power and durability to handle the toughest jobs on construction sites.
