Internal Vibrators - High Frequency **IRFU38/230/10 38mm Head 10m Shaft Internal Vibrator**

The IRFU38/230/10: High-reach internal vibrator for deep concrete consolidation (10m shaft). Maintenance is significantly reduced as there are no drive shafts or greasing required.

- Exceptional reach: 10-meter shaft tackles deep concrete pours for thorough compaction.
- Efficient consolidation: High frequency delivers excellent results for concrete compaction.
- Easy operation: Electric motor provides smooth operation and reduces noise disturbance.
- Durable construction: Built to withstand the demands of tough jobsites.
- Compact head (38mm): Ideal for maneuvering within concrete forms.

Specifications

- Model - IRFU38/230/10
- Item No.- 5100008871
- Lead Length - 15 Meters
- Length - 10 Meters
- Voltage - 230v
- Head - 38mm

The IRFU38/230/10 internal vibrator is a professional tool designed to eliminate air bubbles and improve the strength of concrete by vibration. Its 38mm diameter head ensures effective compaction in medium to large-sized concrete pours. The 10-meter long shaft allows for deep reach into concrete elements, ensuring uniform consolidation throughout. This internal vibrator is ideal for precast concrete applications, soil stabilization, and general concrete consolidation.
