Concrete Vibrators - HMS Modular

M2500/230 Electric 230v HMS Drive Motor

The M2500/230 Electric is a powerful electric motor designed for industrial vibrators used in construction applications. Multipliable Shaft Lengths & Head sizes available.

- Heavy-duty construction for durability on job sites: Built to withstand demanding environments.
- 230V single-phase power for easy job site use: Plugs into standard outlets for convenient operation.
- High nominal power and speed: Delivers strong vibrations for effective material processing or compaction.
- Ideal for powering industrial vibrators: Perfect for a variety of construction applications.
- Durable and powerful for demanding tasks: Ensures reliable performance on tough jobs.

Specifications

- Model - M2500/230
- Item No.- 5100009717
- Power - 1.3kW
- Weight - 5kg
- Voltage - 230v

The M2500/230 Electric is a heavy-duty electric motor specifically designed for powering industrial vibrators used in construction projects. Its robust build ensures durability in tough jobsite conditions. The 230V single-phase power allows for easy operation on most job sites. This electric motor delivers high nominal power and speed to create strong vibrations for efficient material processing or concrete consolidation.
