

General Description of the Company

Anhui Forklift Group Corporation Ltd. (hereinafter referred as Heli) is a leading enterprise of industrial trucks in China.

Since 2016, Heli has been ranked among the top seven in the world, representing Chinese brands to forge ahead towards higher stage. (According to the "Top 20 Industrial lift truck suppliers" released by MMH.)

As the leading enterprise in China industrial truck industry, Heli has the ability and strength to participate in the global competition in a higher level, larger scale and wider field. Heli has established overseas centers in France, Thailand and the United States, which enhance the service ability in overseas market. Besides, relying on our global partners, we have established an overseas marketing and service network in more than 80 countries and regions, and Heli products are sold to more than 150 countries and regions in the world. In the next five years, Heli will vigorously promote the international operation and create a global famous brand.

CPD 15/16 /18/20 GE2DLI

SMALL BODY,
GREAT ENERGY

GREAT ENERGY

High performance ensures high efficiency

Front wheel with dual drive motor provides more power

17-18km/h
Driving speed

20%
Maximum climbable gradient at full load

0.46m/s
Maximum lifting speed with load

0.65m/s
Maximum lifting speed at full load

Strong carrying capacity on high

Multiple configuration, Low energy consumption

Steering according to the demand of oil, reduce the energy consumption of the vehicle

High precision angle potentiometer makes steering more sensitive and accurate.

The forklift truck is equipped with high brightness, long life, more energy saving LED lights.

Low rolling resistance electric truck special solid tire reduces driving resistance consumption.

Small dimension, More flexible

European small vehicle width is suitable for narrow aisle passage. Large angle steering axle makes the turning radius smaller satisfying the loading and unloading operation in narrow aisle.

The minimum turning radius is as low as **1.74m**

Quick charge, long battery life

- Realizes faster charging; standard 202ah lithium battery has ultra long endurance;
- The characteristics of high-density energy and quick charging of lithium battery make all day uninterrupted operation of a forklift truck.

Enjoy driving experience

Alphanumeric display Battery discharge indicator

Keyboard button: Enter Exit button

Hour meter Seat switch LED

Keyboard button: Roll up Handbrake status

Failure alarm LED Keyboard button: Set down

Low battery LED Oil temperature alarm (no use)

Keyboard button: Roll down Keyboard button: Set up

ZAPI Display

P — Powerful
E — Economical
S — Energy Saving

Multiple performance modes could meet the needs of various working conditions.

Center rearview mirror

New pedal parking system, ergonomic design, very convenient

USB power supply

Storage box

The mast with large opening offers good driving vision ensuring operation comfort and safety.

Large space to get on, and large leg space, more comfortable operation

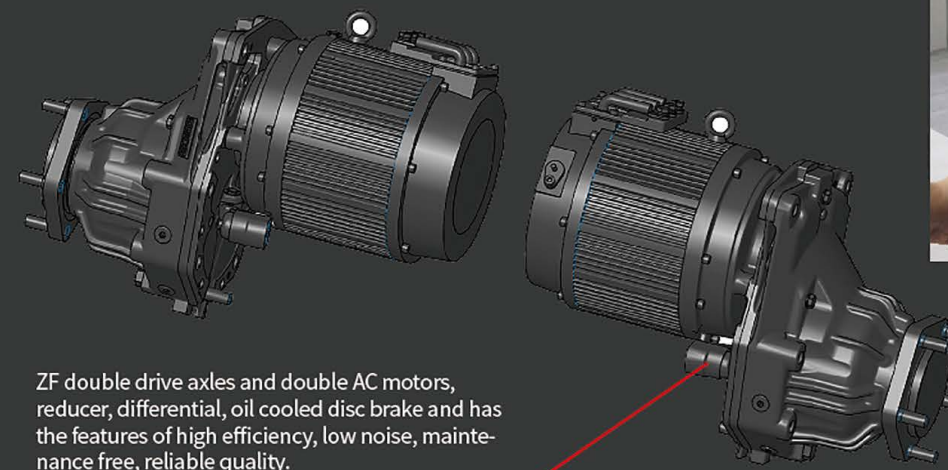

Intelligent security protection

Intelligent induction of mast taking off and landing can avoid limit impact, and it is safe and comfortable;
Intelligent speed limit in different application: multi application recognition and intelligent speed limit balance efficiency and safety;
Intelligent limit buffer: intelligent induction of mast lifting and lowering avoids limit impact and is safe and comfortable;
Intelligent operation protection: a full set of OPS system can avoid misoperation and ensure safety;
Intelligent control strategy: dual core controller is in line with the latest EU safety requirements.
Intelligent steering deceleration: the automatic deceleration function of the turning can reduce the risk of turning over;
Lithium batteries heat themselves automatically at low temperatures, and their adaptation performances are superior.

Reliable Quality, Easy Maintenance

The whole vehicle works alternately in the -20°C cold storage and is parked in the cold storage for 12 hours.
 The whole vehicle is trouble-free and can run sustainably.
 The reinforced casting steering axle is mature and reliable. The force optimization design of mast improves the overall performance and ensure the safety of operation effectively.

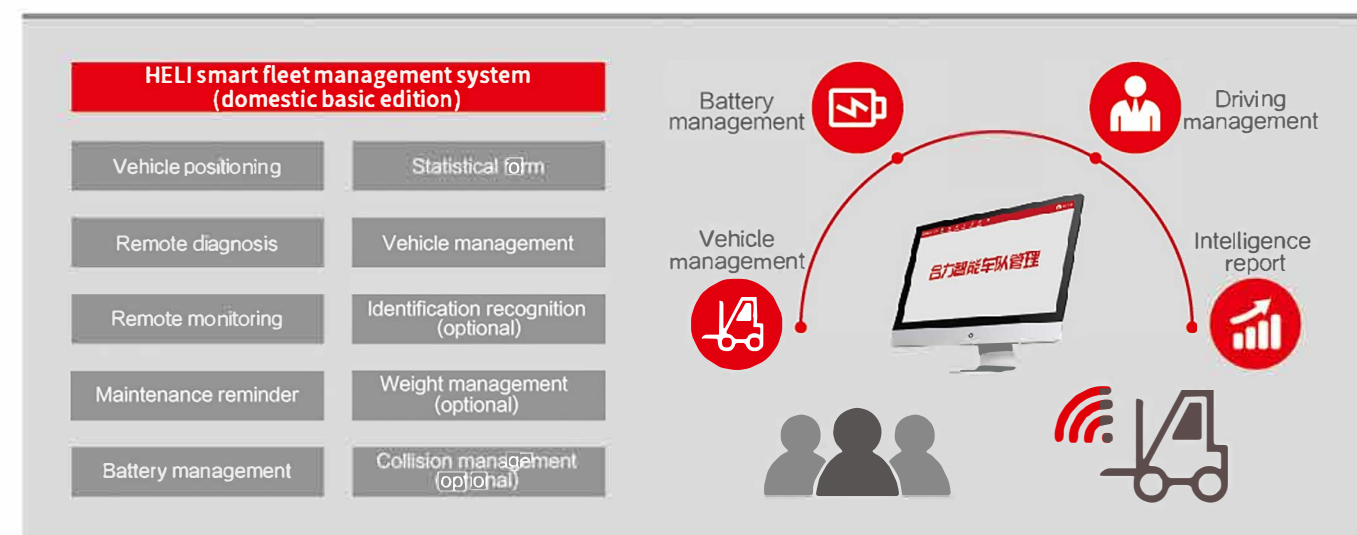

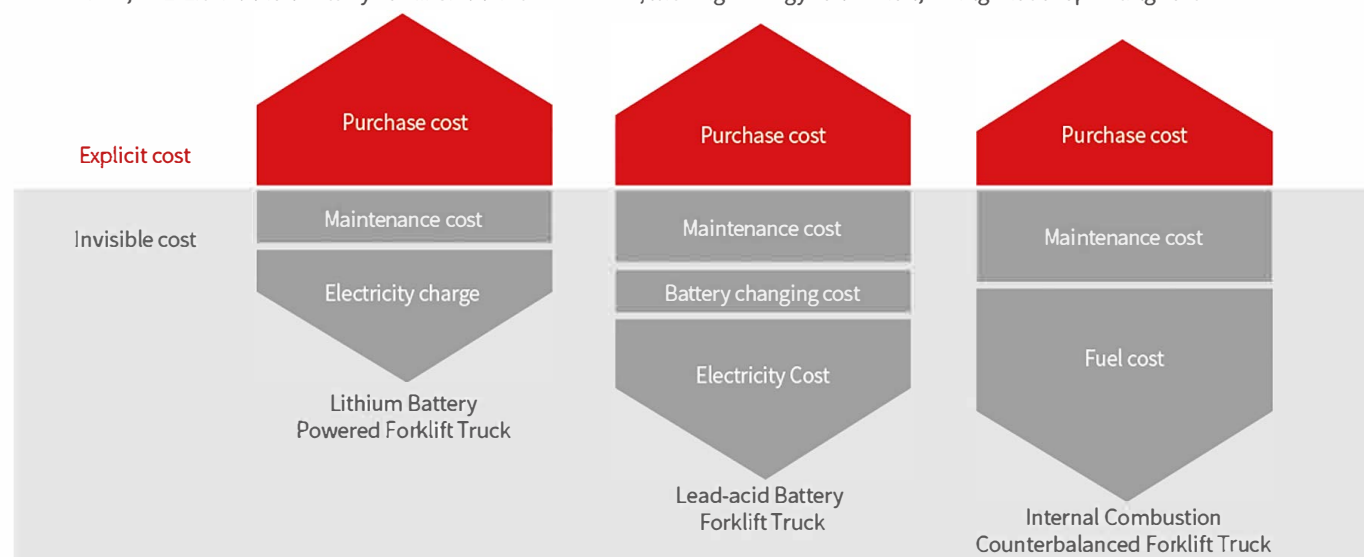

ZF double drive axles and double AC motors, reducer, differential, oil cooled disc brake and has the features of high efficiency, low noise, maintenance free, reliable quality.

Operating Cost Comparison:

Lithium battery forklift **vs.** Lead-acid battery forklift **vs.** IC forklift

The advantages of HELI lithium battery forklift trucks are more prominent in the life cycle cost. Compared with internal combustion forklift truck, lithium battery forklift truck has the advantages of no noise, no pollution, small vibration and simple operation.
 Compared with the lead-acid battery forklift truck, lithium battery forklift has the characteristics of fast charging and charging at any time, which is more suitable for multi shift operation.
 Besides, HELI Lithium-ion Battery Forklift is maintenance-free, with high energy conversion, saving a lot of operating costs.

CPD15 CPD16 CPD18 CPD20

Note:The vertical axis stands for load capacity while the horizontal axis stands for load center which is calculated from the front surface of the forks to the gravity of the standard load. the standard load means a cubic with 1000mm edge length. When the mast is tilted forward, the worker using nonstandard forks for loading large goods, the load capacity will be reduced. The load capacity of standard mast at different load center can be known from this load chart.

Note: Configuration 2: ZAPI; 3:INMOTION; 6: HELI Technology
